

# IPIC Checklist of Priorities for FAD Preparedness

## Prevention

- Join/register with US Swine Health Improvement Plan (<https://iowaagriculture.gov/ship>)
- Review biosecurity plan with all farm staff
- Consult with veterinarian to become proficient in identifying clinical signs and review with all farm staff
- Use SPS resources to create an enhanced biosecurity plan
- Verify all premises ID (PIN) (<https://lms.pork.org/Premises>)
- Maintain electronic pig movement records with PIN locations (i.e. using AgView)
- Maintain daily movement records (people, trucks, equipment, etc) in and out of site
- Have contact list of attending veterinarian, state veterinarian, DNR

## Contingency planning

- Develop a plan for a national standstill (minimum of 72 hours) regarding movements
- Develop a plan if feed deliveries are included in standstill (minimum of 72 hours)
- Develop a plan for mortalities if rendering is not available during the standstill
- Think through a method for mass euthanasia
- Identify potential carbon source for disposal
- Identify a potential place for on-site disposal of carcasses and discuss options with DNR if needed
- Establishment of C&D station(s)
- Establish plan for “isolated/designated/alternative” caretaker routines in event of standstill
- Contact herd veterinarian for eligibility of Certified Swine Sample Collector program

## Response

- Establish appropriate depopulation method WITH IDALS (***do not*** do any euthanasia without consulting IDALS as indemnity request could be denied)
- Maintain appropriate documentation of method, number, age, etc during depopulation
- Establish carcass disposal method with IDNR approval
- Fill and submit appraisal and indemnity request forms with IDALS and USDA
