Managing Your Unseen Employee: The Ventilation System

9:30-10:15  The Pig and Its Environment
10:15-12:00  Fans, Inlets and Controllers
12:00-12:30  Lunch
12:30-2:00  Split Groups  
  a. Curtains, Tunnels and Cooling  
  b. Hands-on Training
2:00-3:30  Rotate Groups

Space is limited to first 30 registrations! Need 10 pre-registered to hold session. Register by contacting Russ Euken at 641-923-2856 or reuken@iastate.edu

Featuring hands-on demonstration

- setting fan controllers
- adjusting inlets
- measuring static pressure effects
- observe plugged inlet effects
- other real-barn effects

The unique workshop and demonstration are conducted using an enclosed mobile ventilation facility equipped with variable speed fans, inlets, a curtain, controllers and monitoring tools, and other equipment. You can make adjustments and determine the effects on the environment in the building.

The classroom sessions include the basics of ventilation systems, effective temperature requirements, troubleshooting tools and techniques and other ventilation situations.

Due to assistance from funds provided by Smithfield and administered through the Iowa Pork Industry Center at Iowa State University, workshops are currently available at no cost to participants.

The ventilation trailer is a multi-state project with funding from Pork Checkoff and development by the land grant universities of Iowa State, Minnesota, Nebraska and South Dakota State.
For information or to register contact:
