

# National Standstill Contingency Planning Checklist

	Yes	No	N/A
<b>Movement and Standstill Planning</b>			
Movement Restrictions:			
<ul style="list-style-type: none"> <li>Clearly define all restrictions on animal, vehicle, and personnel movement during the standstill. Specify which movements are prohibited and any exceptions.                             <ul style="list-style-type: none"> <li><a href="#">Premises Trace-In and Trace-Out Priority Ranking</a></li> </ul> </li> </ul>			
Feed Delivery Management:			
<ul style="list-style-type: none"> <li>Develop a plan outlining how feed deliveries will be handled during the standstill, including protocols for delivery timing, personnel access, and biosecurity measures to prevent disease spread.</li> </ul>			
Essential Deliveries:			
<ul style="list-style-type: none"> <li>Establish procedures for managing deliveries of essential supplies such as semen, medications, supplies, and farm inputs, ensuring strict adherence to biosecurity protocols.</li> </ul>			
Communication Protocol:			
<ul style="list-style-type: none"> <li>Define how movement restrictions and exceptions will be communicated to all stakeholders, including suppliers, transporters, and staff.</li> </ul>			
<b>Biosecurity and Facility Management</b>			
<a href="#">Clean and Disinfection (C&amp;D) Stations:</a>			
<ul style="list-style-type: none"> <li>Specify locations for C&amp;D stations controlling all human and vehicle traffic if the site falls within a control zone. Include setup instructions, approved disinfectants, and frequency of use.</li> </ul>			
Traffic Flow Controls:			
<ul style="list-style-type: none"> <li>Develop clear procedures for traffic movement to minimize cross-contamination, including separate entry and exit points if feasible.</li> </ul>			
Personal Protective Equipment (PPE):			
<ul style="list-style-type: none"> <li>Define PPE requirements for all personnel and visitors during the standstill, including donning and doffing procedures.                             <ul style="list-style-type: none"> <li>PPE may include: boot covers, booties, coveralls, hearing protection, face masks, disposable gloves, etc.</li> </ul> </li> </ul>			
Monitoring and Documentation:			
<ul style="list-style-type: none"> <li>Establish protocols for monitoring compliance with biosecurity measures and documenting all movements and activities related to C&amp;D procedures.</li> </ul>			

<b>Depopulation, Euthanasia, and Mortality Management</b>			
Mass Euthanasia Protocol:			
<ul style="list-style-type: none"> <li>Develop detailed procedures for humane mass euthanasia, including methods to be used, safety considerations, personnel roles, and animal welfare standards.</li> </ul>			
Training Personnel:			
<ul style="list-style-type: none"> <li>Identify trained personnel authorized to perform euthanasia and disposal tasks, and establish protocols for additional training if needed.</li> </ul>			
Materials and Equipment:			
<ul style="list-style-type: none"> <li>List and ensure availability of all materials and equipment needed for depopulation and disposal activities (e.g., captive bolt devices, PPE, tools). Include storage and accessibility information.</li> </ul>			
Alternate Disposal Methods:			
<ul style="list-style-type: none"> <li>Outline procedures for managing mortalities if rendering is unavailable, including composting, burial, or incineration. Include detailed descriptions of methods appropriate for the site.</li> </ul>			
On-Site Disposal Locations:			
<ul style="list-style-type: none"> <li>Identify specific sites on the farm for carcass disposal that comply with environmental regulations. Include maps or diagrams if possible. <ul style="list-style-type: none"> <li><a href="#">Iowa DNR regulations on Swine FAD Outbreak Disposal</a></li> <li><a href="#">Iowa DNR Interactive Burial Zone Map</a></li> </ul> </li> </ul>			
<u>Carbon Source Identification:</u>			
<ul style="list-style-type: none"> <li>Identify and stockpile appropriate carbon materials (e.g., wood chips, straw) necessary for composting or burial. Include quantities and storage locations. <ul style="list-style-type: none"> <li><a href="#">USDA Emergency Carcass Management Guide</a></li> <li><a href="#">Carbon Sources for Composting</a></li> </ul> </li> </ul>			
Coordination with Regulatory Agencies:			
<ul style="list-style-type: none"> <li>Establish communication with the Department of Natural Resources (DNR) or relevant authorities to ensure disposal plans meet legal and environmental standards.</li> </ul>			
<b>Veterinary Coordination and Diagnostic Preparedness</b>			
<u>Certified Swine Sample Collector (CSSC) Program:</u>			
<ul style="list-style-type: none"> <li>Confirm site participation in the program with the herd veterinarian. Ensure at least one person per site is certified in anticipation of an outbreak.</li> </ul>			
Diagnostic Sampling Protocols:			
<ul style="list-style-type: none"> <li>Establish detailed procedures for sample collection, handling, and submission to diagnostic laboratories. Include documentation and chain-of-custody protocols.</li> </ul>			
Veterinary Support:			
<ul style="list-style-type: none"> <li>Ensure availability and contact information for veterinary support during the standstill, including emergency response procedures.</li> </ul>
