

SOW MORTALITY PROJECT-WEEK 2 UPDATE 1-18-19

IOWA PORK INDUSTRY CENTER www.ipic.iastate.edu

IOWA STATE UNIVERSITY

Extension and Outreach

Overview: Calendar Year 2019 Week 2. Eighty sow farms representing an inventory of 303,917 sows, have submitted mortality records indicating 707 sow deaths. The following figures summarize the distribution and variation of sow deaths across reporting sow farms.

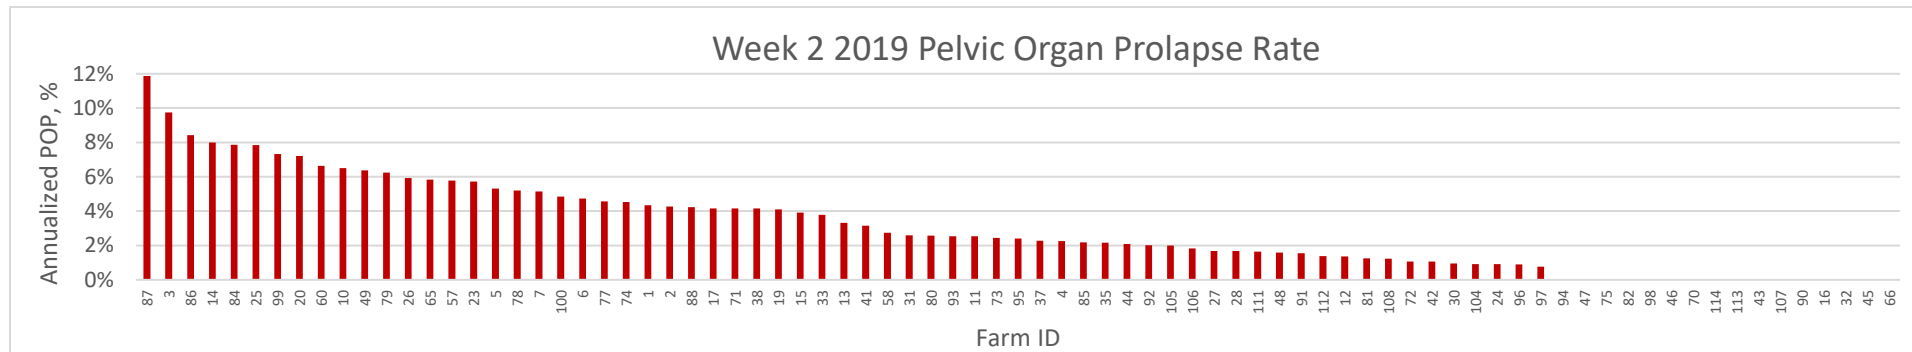

Figure 1 (Above). Annualized rate of pelvic organ prolapse (POP) varied across sow farms during Week 2 from over 11% to 0%.

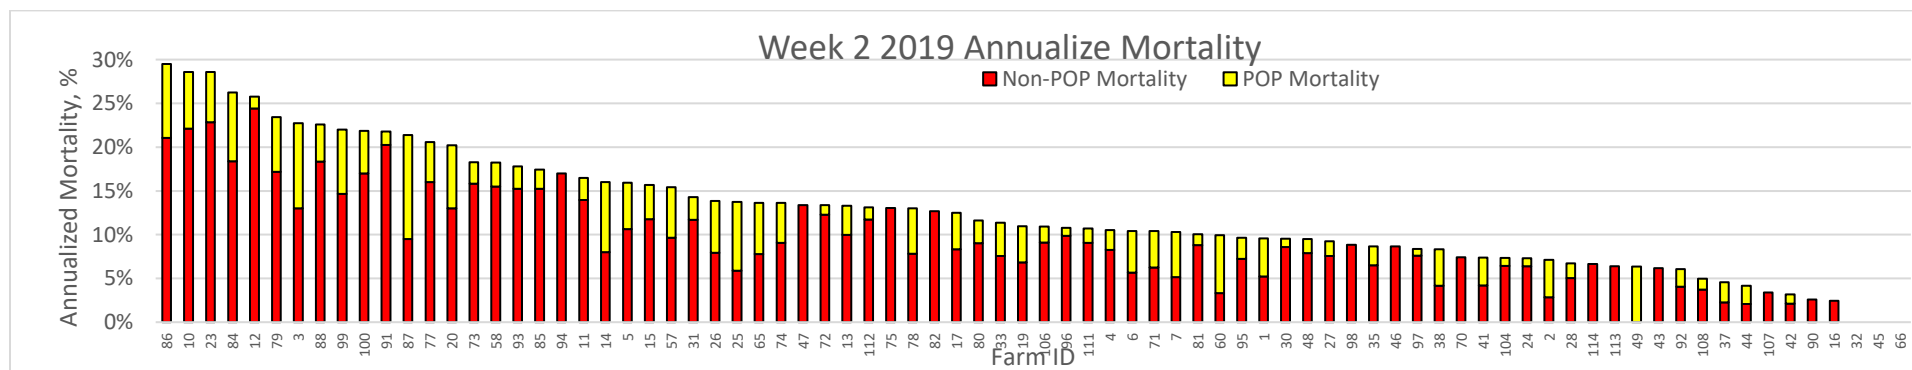

Figure 2 (Above). Annualized total mortality for reporting sow farms for Week 2. The red portion of the bars represent the proportion of the sow mortalities that occurred that were not due to prolapse while the yellow portion of the bars indicates the proportion occurring due to prolapse.

Figure 3 (Right). Breakdown of all mortalities reported for Week 2. A total of 23% of sow mortalities were the result of some form prolapse. Approximately 27% died due to lameness and related causes and 40% died due to other or unknown causes.

THIS PROJECT IS SUPPORTED BY THE NATIONAL PORK BOARD PROJECT #17-224.
