

SOW MORTALITY PROJECT-WEEK 46 UPDATE 11-26-18

IOWA PORK INDUSTRY CENTER www.ipic.iastate.edu

IOWA STATE UNIVERSITY
Extension and Outreach

Overview: Calendar Year 2018 Week 46. Seventy-nine sow farms representing an inventory of 312,524 sows, have submitted mortality records indicating 746 sow deaths. The following figures summarize the distribution and variation of sow deaths across reporting sow farms.

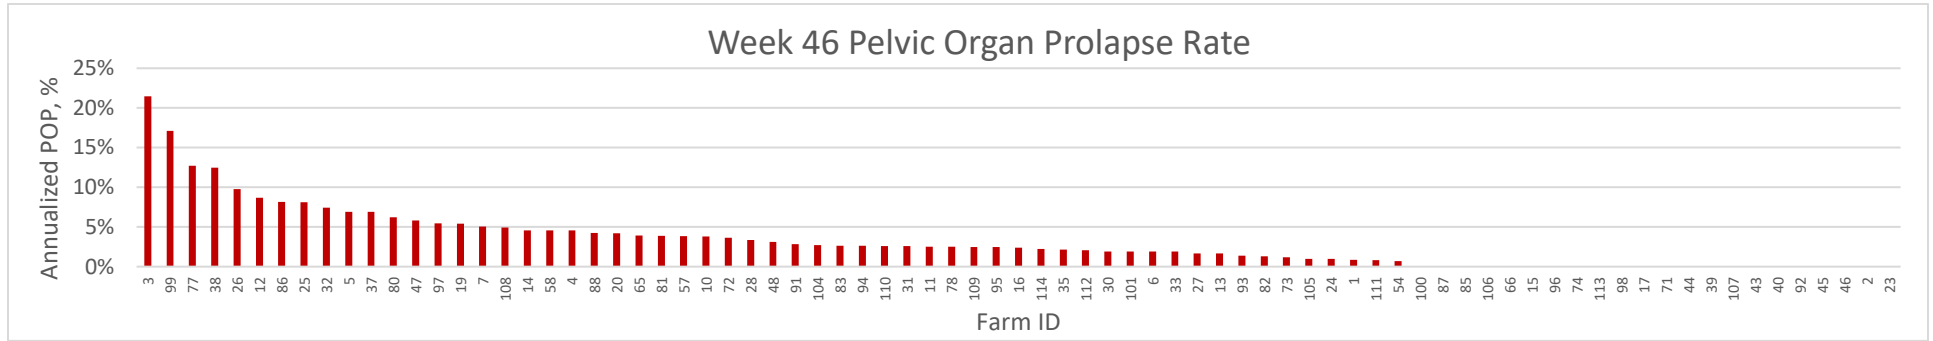

Figure 1 (Above). Annualized rate of pelvic organ prolapse (POP) varied across sow farms during Week 46 from over 21% to 0%.

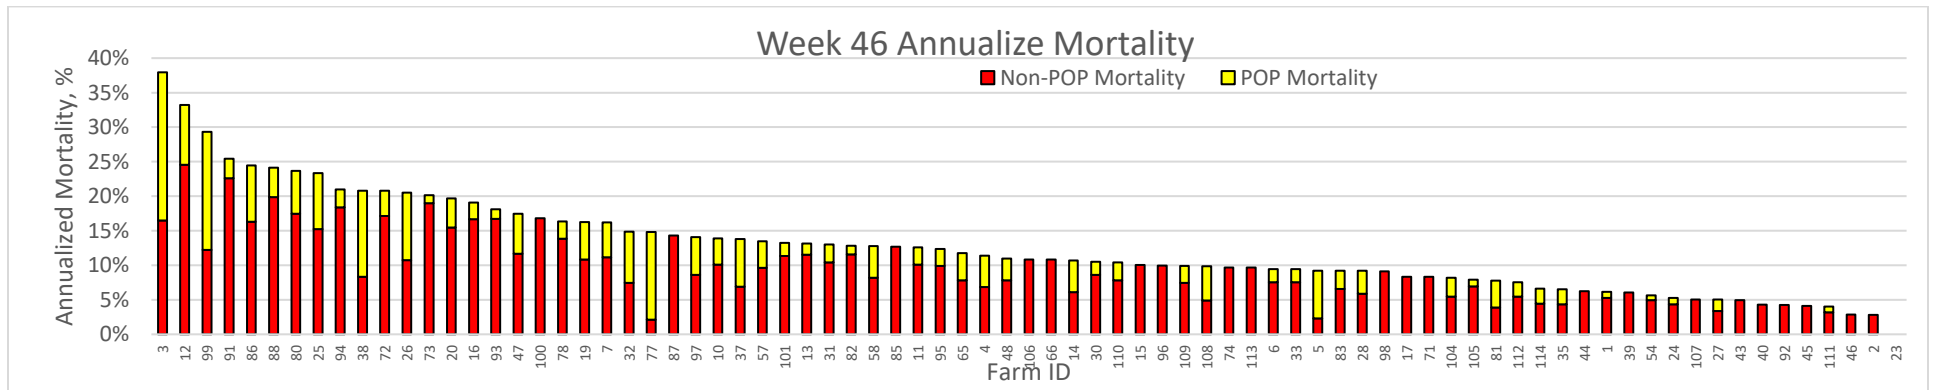

Figure 2 (Above). Annualized total mortality for reporting sow farms for Week 46. The red portion of the bars represent the proportion of the sow mortalities that occurred that were not due to prolapse while the yellow portion of the bars indicates the proportion occurring due to prolapse.

Figure 3 (Right). Breakdown of all mortalities reported for Week 46. A total of 25% of sow mortalities were the result of some form prolapse. Approximately 29% died due to lameness and related causes and 37% died due to other or unknown causes.

THIS PROJECT IS SUPPORTED BY THE NATIONAL PORK BOARD PROJECT #17-224.
